Conferences

15-16 April

RAF Museum London

2015

From 'Shooting the Front' to Combat ISTAR: The Evolution of Aerial Intelligence and Reconnaissance

From aerial observation and photographic reconnaissance in the First World War through to the emergence of Combat ISTAR, effective intelligence gathering has been at the heart of air operations since the earliest use of air power. This is because air power is able to provide longer, deeper and more persistent forms of information collection.

This conference, organised in conjunction with the RAF's Centre for Air Power Studies, explores the importance of aerial based reconnaissance and intelligence gathering and its effect on war in all its facets.

OROYAL MUSEUM

Research Programme 2015

For more details about the RAF Museum's research programme, please email Ross Mahoney at **ross.mahoney@rafmuseum.org**

The Royal Air Force Museum tells the story of the RAF through its people and collections

The Trenchard Lectures in Air Power Studies

Delivered by emerging and established scholars, these lectures will explore a variety of air power related topics ranging from historical themes to contemporary issues.

Held in conjunction with the Royal Aeronautical Society and the University of Wolverhampton.
