

Aeronauts Fun Sheet – Birds Eye View?

Can you fly?

What can we use to help us fly?

Why not try out our hang glider?

Lie on the panel and hold on to the bar.

How does a hang glider fly? Look at the banner in front of the hang glider, this will explain a little about how it can fly.

How do you think the ground looks from high in the sky? Underneath the hang glider the carpet gives you an idea of how things might look when you are flying.

Can you imagine a bird's eye view? In the box below draw a picture of how your home, school or favourite place might look from high in the sky.
