What do you need to do?

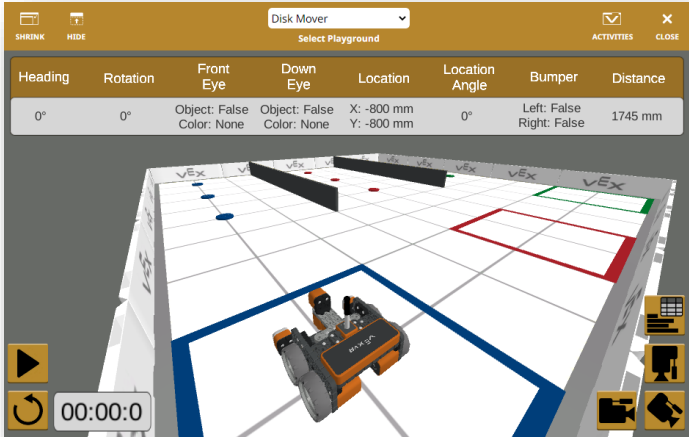

VEXcode VR Coding Challenge

VEXcode VR is a virtual robot coding tool. Using Scratch Blocks, you can code your robot through various different virtual challenges. To access VEXcode VR, visit vr.vex.com. You don't need to install anything, VEXcode VR will run in your browser.

In this challenge, you will need to code your robot to collect coloured disks and place them into the correct colour goals. In VEXcode VR you will use the Disk Mover Playground. Watch the Challenge Video to find out more!

- Challenge 1**
Collect all three blue disks and place them in the blue goal
- Challenge 2**
Place all the blue disks in the blue goal, red disks in the red goal and green disks in the green goal

For help, visit kb.vex.com and click VEXcode VR
