

# Window Wonders

You might be indoors for most of the day, but you can still look for things that fly. Just look out of the window.

You could call your family or friends to find out what flying things they can spot out of their windows.

If you are lucky, you might even see the Royal Air Force fly past.

Decide how long you are going to look out of the window.  
10 minutes, half an hour? It's up to you.  
Maybe try different days or in different weather.

Use a tally chart to record how many flying things you see.

## Birds

Example

7 or Seven

## Insects

Example

5 or Five

## Planes and Helicopters

Example

3 or Three

What is the strangest thing you can imagine flying past your window?
