Survivors

The last six RAF Ansons were withdrawn 28 June 1968.

Of 263 production Anson 19 aircraft, several survive, in addition to TX214;

TX183/G-BSMF – Al Mahata (Old Sharjah Airport) Museum, Sharjah, U.A.E
Ex Gulf Air Museum, Dubai May 2001
The Anson "G-AKVV" is ex TX183, built at Yeadon in 1946. It was with Bomber Command Communications Flight at Booker, then Abingdon Station Flight, before moving on to No.1 ANS at Hullavington. It went later to Shawbury, and A&AE Boscombe Down where its service career finished in 1968. It was then sold to the Shuttleworth Trust, who were planning on a restoration programme, but that never came to fruition. It was registered G-BSMF. The flaps are half lowered, so you can see identity plates on both sides. It is quite clearly marked as "Type no 652A" and Mk XXI on one side and Mk 21 on the other. The flaps carry the dates 22/10/48 on one side and 9/1/51 on the other. Maybe the flaps were taken from a Mk 21, and fitted to this C19 airframe.

TX192 Belgian Air Museum Museum storage – Vissenaken, Belgium. Ex Guernsey fire training hulk.

TX213/G-AWRS - NEAM Sunderland

TX201/G-AGWE Titusville – Space Coast Regional Airport’ hulk.

TX226 - Air Atlantic Classic Flight - spares for airworthy Anson T.21 WD413; stored off-site.

TX235 - Air Atlantic Classic Flight; stored off-site.

VL348/G-AVVO - Newark Air Museum; wings from Anson I G-ALIH.

VL349/G-AWSA - Norfolk & Suffolk Aviation Museum

VP519/G-AVVR Nose only - The Aeroplane Collection. At Boulton Paul Heritage Project, Pendeford, Wolverhampton until 2012, but since returned to owner.

141 Irish Air Corps Casement Aerodrome, Baldonnel. Withdrawn from use 20 Jan 1962; instructional use until 1974.
